

We help organizations around the world protect the confidentiality, integrity, and availability of their critical information and systems.

The Trustwave Distinction

We help tens of thousands of organizations – financial institutions, large and small retailers, global electronic exchanges, educational institutions, business service firms and various government agencies – secure their critical information. With offices throughout North America, South America, Europe, the Middle East, Africa, Asia and Australia, Trustwave delivers information security and compliance management solutions to organizations throughout the world. When you choose Trustwave, you receive unique security solutions, experience and expertise provided by a global leader in compliance management and information security – with knowledge and methods you cannot find anywhere else.

- **Experience** – Trustwave has helped tens of thousands of organizations identify and implement data security and compliance management solutions to best fit their needs. Our staff's unique blend of security experience in the private and public sector – including the National Security Agency (NSA), US Secret Service, Department of Justice (USDOJ) and leading data security firms – allows us to tailor technology and services to your organization's particular requirements.
- **Expertise** – We understand the nuances of industry and regulatory compliance. With this expertise, we guide you toward and validate your compliance with the Payment Card Industry Data Security Standard (PCI DSS), HIPAA, SAS-70, GLBA, ISO 27002 (formerly 17799) and other standards and regulations.
- **Innovation** – Trustwave's innovative approach to Web-based solutions makes the path toward compliance practical and efficient. Our proprietary security appliances integrate vulnerability identification and intrusion detection or prevention into a single appliance for asset-centric, self-tuning intrusion detection and prevention systems (IDS/IPS). In addition, as a Certificate Authority (CA) we issue the next generation in SSL certification – Extended Validation (EV) SSL certificates – along with traditional SSL certificates.
- **Reputation** – Trustwave is a leader in PCI DSS compliance management. More banks trust Trustwave than any other Qualified Security Assessor (QSA) to ensure the compliance of their merchants with the PCI DSS.

Our Mission is Clear

- *Protect and secure your IT environment*
- *Facilitate your compliance with industry and regulatory standards*
- *Respond to your data security and compliance needs quickly and reliably*
- *Enhance your organization's operations*
- *Provide you with access to 24x7x365, multi-lingual support*

About Trustwave

Trustwave is a leading, global provider of information security and compliance management solutions to large and small businesses and the public sector. Trustwave offers and supports SSL certificates, proprietary security appliances, managed security services and compliance management solutions to help organizations simplify, accelerate and validate their compliance with industry standards and regulations such as PCI DSS, HIPAA, SAS-70, GLBA and ISO 27002 (formerly 17799) among others. Trustwave's clients include financial institutions, large and small retailers, global electronic exchanges, educational institutions, business service firms and government agencies. Trustwave is headquartered in Chicago with offices throughout North America, South America, Europe, the Middle East, Africa, Asia and Australia.

Security & Compliance Solutions

Deployed separately or in tandem, our solutions fit any organization's information security or compliance management needs.

<p>TrustKeeper®</p> <ul style="list-style-type: none"> • Compliance Validation Services • Vulnerability Scanning • Penetration Testing • Portal-based PCI Self-assessment Questionnaire 	<p>TrustKeeper is a Web-based, state-of-the-art vulnerability assessment and compliance management solution that combines the critical components of information assurance (standards, policy, compliance and audit) into a single, easy-to-use solution. Tens of thousands of organizations rely on TrustKeeper to manage and validate their compliance with a variety of regulations such as the Payment Card Industry Data Security Standard (PCI DSS) and numerous other industry and regulatory mandates.</p>
<p>Risk ProfilerSM Web-based Risk Assessment</p>	<p>Risk Profiler is a Web-based solution for banks, acquiring institutions and enterprises to assess and manage the risk of their merchants or outlets. Risk Profiler links seamlessly with TrustKeeper to introduce merchants to the PCI DSS and facilitate their compliance.</p>
<p>Managed Security Services</p> <ul style="list-style-type: none"> • Secure E-mail • Network Security Monitoring • Unified Threat Management (UTM) • Internal Vulnerability Scanning (IVS) • Intrusion Detection (IDS) • Intrusion Prevention (IPS) • Firewall • Encryption 	<p>Trustwave's managed security services enable you to upgrade your organization's network environment to include best-of-breed security solutions while avoiding the strain of maintaining or acquiring your own in-house security staff. With our managed security services, organizations of any size benefit by lowering the internal costs associated with information security management, monitoring and support.</p>
<p>Trusted CommerceSM Program</p> <ul style="list-style-type: none"> • Extended Validation (EV) SSL Certificates • Traditional SSL Certificates • Payer Authentication • Trusted Commerce Seal 	<p>Trustwave's e-commerce security program secures vital business data such as cardholder data and other sensitive consumer information on the Internet. We issue both traditional SSL certificates and the next generation in SSL certification—Extended Validation (EV) SSL certificates. EV SSL certificates provide greater visibility of a Web site's security by shading a visitor's browser bar green. With the Trusted Commerce program you also receive the Trusted Commerce seal to indicate that information (including cardholder data) transmitted or processed through your Web site is done so in accordance with best security practices.</p>
<p>Application Security</p> <ul style="list-style-type: none"> • Payment Application Best Practices (PABP) • Application Code Review 	<p>Trustwave Application Security services ensure that your applications are secure and compliant with the latest regulatory and industry standards—including PABP. The service includes a thorough evaluation of the operations, technology, controls, policies and procedures related to your application.</p>
<p>Incident Response</p>	<p>Numerous organizations have counted on Trustwave Incident Response services to respond to security compromises and conduct computer forensic investigations. As part of an investigation, Trustwave will identify the party or parties responsible for theft of intellectual property, validate allegations of employee misconduct, identify network intruders, assist in recovering losses, validate copyright infringement claims and provide electronic discovery and civil litigation support.</p>
<p>TrustMinderSM Web Content Scanning</p>	<p>TrustMinder, an automated content-monitoring solution, ensures Internet commerce conforms to regulatory, industry and proprietary standards. Utilizing an automated scanning engine and a multi-phase methodology, TrustMinder scans, inventories and analyzes Web site content including linked sites.</p>
<p>VendorTrustSM Partner Compliance Management</p>	<p>VendorTrust, an automated evaluation solution, assesses the security posture of all the external entities connected to an organization's network, verifying compliance for organizations required to meet industry or regulatory standards.</p>
<p>Regulatory Compliance Suite</p> <ul style="list-style-type: none"> • SOX • SAS-70 • HIPAA • GLBA • ISO 27002 (formerly 17799) • FISMA 	<p>To help businesses, federal agencies and other organizations meet various regulatory requirements, Trustwave has developed industry-specific solutions to make compliance conceivable and attainable. Trustwave's regulatory compliance services are powered by TrustKeeper.</p>
<p>Security Consulting</p>	<p>Our data security experts will work with your in-house staff to perform penetration tests on your systems, develop information security policies and procedures, design security architecture, perform gap analyses or procure, configure and implement security appliances on-site.</p>
<p>Intrusion Prevention System (IPS)</p>	<p>Our proprietary Intrusion Prevention System (IPS) integrates vulnerability scanning and intrusion prevention technology into a single appliance to provide asset-centric, self-tuning intrusion prevention that significantly reduces false positives.</p>
